Inventors: Edwin F. Ullman, *et al.*

Group Art Unit: 1641

Filed: October 17, 2000

Examiner: Christopher L. Chin

Title: Simultaneous Screening of Multiple Analytes

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

Comments on Reasons for Allowance

This is responsive to the Examiner's Statement of Reasons for Allowance that accompanied the Notice of Allowance dated May 17, 2004, from the U.S. Patent and Trademark Office in the above-identified patent application.

The Examiner's comments might be interpreted as requiring more that one second reagent in Applicant's methods and kits. While the claimed methods and kits include the use of multiple antibodies, one each for each of the drugs suspected of being in the sample, and multiple first reagents, one each for each of the drugs suspected of being in the sample, the second reagent called for in the present methods and kits is usually, but not necessarily always, a single reagent. As such, the claimed methods and kits distinguish over Oh, *et al.*, who detects one analyte using one set of reagents only.

Respectfully submitted,

Theodore J. Leitereg  
Attorney for Applicant
